REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of the claims is the inclusion of the limitation of the plurality of ignition coils arranged in such a manner that at least the directions of adjacent coils do not coincide with one another, which is not found in the prior art references. The prior art teaches of an ionic current detection circuit with a plurality of ignition coils connected to spark plugs, as disclosed by Takahashi, US 5,895,839, in the prior office action dated 11/02/2004. However, the prior art fails to teach a plurality of ignition coils, each with a primary and a secondary side, wherein the coils are arranged in a manner where the directions of adjacent coils do not coincide. Although, Bohman, US 4,042,132, teaches of arranging single coils in such a way that the central axes of adjacent coils do not coincide, the prior art fails to teach the said arrangement for a plurality of ignition coils, each having a primary and a secondary winding.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marina Kramskaya whose telephone number is (571)272-2146. The examiner can normally be reached on M-F 7:00-4:00.
